ENTRANCE MATS

It is a recognised fact that 70-80% of interior soiling enters buildings via foot traffic. Good entrance matting systems can dramatically reduce this by stopping dirt at the door – in fact one square metre of matting can hold up to half a litre of excess moisture or remove half a kilo of dirt in a week, significantly reducing cleaning and maintenance costs and preventing slip hazards.

It is recommended that no less than 5 linear metres of matting is required to remove dirt and moisture effectively, allowing each foot to make contact at least 4 times. This can be divided into three definite zones.

- Zone 1** Removal of heavy debris. 40% of dirt and moisture is removed in the first 1.5 metres. This is ideally achieved outside the doorway.
- Zone 2** Fine debris and moisture is simultaneously scraped and wiped off shoes. 20% is removed in this zone.
- Zone 3** Additional wiping mats complete the drying process within approximately 5 metres.

Taylor West entrance mat range combines style and performance, ensuring a good first impression and effective dirt control in any doorway.

How to order

- 1) State the quantity, size and configuration (landscape or portrait) of the mats required and supply suitable artwork.
- 2) Once the order is confirmed, a full colour proof will be submitted by e-mail for approval. Colours will be matched as closely as possible from the standard colour range.
- 3) Once any alterations are completed and the design is approved, mats are scheduled for production.

Promotional Mat Range

We offer one of the most comprehensive ranges of printed mats available in the UK and is particularly suited to large quantities. From single colour logos through to full colour photo quality, there is a product to suit almost any application. The range covers household mats, commercial entrance mats, plus point-of-sale, bartop and exhibition mats....we can even print onto artificial grass.

For more details, please request a copy of the Tylor West brochure.

INDUSTRIAL MATS

Standing for long periods of time on cold, hard floors causes general fatigue plus a host of other health complaints. These conditions, coupled with slips, trips and falls lead to decreased productivity, absenteeism and ultimately cost employers millions each year. Taylor West industrial mats are designed to reduce these occupational risks to a minimum and create a safe, comfortable working environment.

Up to 80% of workers who stand at work suffer from backache, headaches, poor circulation or knee and foot problems. Research has proved that using an anti-fatigue mat during an 8 hour period reduces tiredness and increases comfort by 50% in comparison to a hard floor. The matting encourages posture change and insulates the feet from temperature extremes and vibration, often reducing levels of absenteeism by up to 30%.

20% of accidents in the workplace are caused by slips, trips and falls. Anti-slip surfacing or raised duckboards can eliminate these risks by keeping feet off wet, slippery floors.

Breakage of delicate items and tools can be costly and troublesome to clean up. Matting can be utilised to protect both floors and equipment.

Cushion Link Solid Top

- The ultimate for ergonomic comfort and safety in heavy duty dry industrial applications.
- Mats can be interlocked and edged using the simple bevel system to create any mat size and shape.
- Anti-slip pebble texture surface with unique underside design provides superb anti-fatigue properties.
- Compatible with Cushion Link open top system (see page 27).
- Manufactured from high quality resilient rubber compounds, resistant to extreme temperatures and most chemicals.
- Overall height 19mm.

Ramp System

Male and female attachable bevels available in black or yellow.

Available in six types as listed.

General Purpose

- General purpose rubber compound.

Nitrile Rubber

- 75% nitrile rubber compound, grease resistant.

Nitrile Rubber FR

- 100% nitrile rubber compound, oil proof and fire retardant, suitable for welding areas.

Nitrile Rubber FR Abrasive Coating

- 100% nitrile rubber compound, oil proof and fire retardant, suitable for welding areas.
- Abrasive coating for extremely slippery areas (slip resistant RB according to DIN51130).

Static Dissipative Nitrile Rubber FR

- 100% nitrile rubber compound.
- Static dissipative - meets IEC61340-4-1, measured resistance $R_g 10^6-10^9\Omega$, $R_p 10^6-10^9\Omega$.

Conductive Nitrile Rubber FR

- 100% nitrile rubber compounds.
- Conductive - meets IEC61340-4-1, measured resistance $R_g 10^6-10^9\Omega$, $R_p 10^6-10^9\Omega$.

Cushion Link Open Top

- Superb ergonomic comfort and safety in heavy duty dry or wet industrial applications, including food areas.
- Mats can be interlocked and edged using the simple bevel system to create any mat size and shape.
- Open top allows liquids to drain away, leaving a safe work surface.
- Compatible with Cushion Link Solid Top system (see page 26).
- Manufactured from high quality resilient rubber compounds, resistant to extreme temperatures and most chemicals.
- Overall height 19mm.

Nitrile Rubber FR

- 100% nitrile rubber compound, oil proof and fire retardant, suitable for welding areas.

Brake Fluid Resistant FR

- 100% EPDM rubber compound, brake fluid resistant.

Nitrile Rubber Anti-Bacterial

- Anti-bacterial 100% nitrile rubber compound, suitable for use in food processing plants.

Nitrile Red Rubber

- 75% nitrile rubber compound, grease resistant, suitable for contact with vegetable oil and animal fats in food service applications.

Nitrile Rubber FR Abrasive Coating

- 100% nitrile rubber compound, oil proof and fire retardant, suitable for welding areas.
- Abrasive coating for extremely slippery areas. (Slip resistance R13 according to DIN 51130).

Oilzone

- High quality anti-fatigue duckboard matting for wet or dry industrial use.
- Made from 100% nitrile rubber, designed to withstand industrial oils and harsh chemicals.
- Drainage holes and raised studs allow fluids and debris to fall through, leaving a clear top surface.
- Aggressive slip resistant surface.
- Highly visible orange bevelled borders on three sides for safety.
- Can be simply cleaned with detergent or water-jet.
- Overall height 22mm.

Guide for ordering custom size matting

- Each of the products can be custom-designed for a specific work station (See figure 1) or used in continuous lengths.
- Ramp edges can be specified for any or all sides as required.
- Mat is factory assembled (Extra large mats are made in sections to facilitate shipping and handling).
- To order, provide a simple sketch that illustrates the shape, dimensions and ramped edges (See figure 2).
- See figure 3 for dimensions of components.
- If you plan to add to your mat at a later date, please specify when ordering.

Available in four types as illustrated above.

- 520HD - Heavy duty**
- Perforated to facilitate drainage of spills.
 - Weight 15.8 kg per m².

- 522HD - Heavy duty with Surestep**
- Perforated to facilitate drainage of spills.
 - With Surestep abrasive coating.
 - Weight 15.8 kg per m².

- 920HD - Heavy duty solid**
- Closed top.
 - Weight 16.2 kg per m².

 - Weight 16.2 kg per m².

Workzone

- Multi-purpose duckboard type mat with safety anti-slip surface and bevels on all sides.
- Honeycomb design allows liquids to disperse quickly, leaving surface clear.
- Easy to handle for cleaning purposes.
- Overall height 13mm

Available in two types as listed

Standard Black

- Suitable for heavy duty industrial use in wet or dry areas.

Red or Blue

- 75% nitrile grease resistant rubber suitable for use in food service applications.

Workzone Deluxe

- Tough rubber duckboard matting, offering exceptional comfort and safety in heavy duty applications.
- Straight edges allow mats to be joined in both directions using connectors available, to cover large areas around machinery.
- Drainage holes and raised studs allow fluid and debris to fall through, leaving a clear surface.
- Designed to withstand harsh chemicals and yield a long service life.
- Aggressive slip-resistant surface.
- Anti-trip bevel system available. (see details below).
- Overall height 20mm

Bevel System

Attachable vinyl bevels are available in two sizes. These can be supplied with internal or external corners, or straight ends to suit individual requirements. A simple sketch, showing dimensions and positions of bevels will ensure that appropriate components are supplied.

Surefoot

- Duckboard mats suitable for medium duty industrial use in wet or oily areas, including food applications.
- Drainage slots and raised studs underneath allow fluids and debris to fall through, keeping the surface clear.
- Made of 100% PVC, resistant to industrial oils.
- Overall height 11mm.

Surestep version available, with abrasive anti-slip coating, designed for extremely slippery areas.

Kumfi Tile PVC Ruby Red Shown with Topaz Yellow edging

- Simple and effective interlocking system ensures a firm, quick joint which can be easily, but not accidentally released.
- Bevelled edge component moulded with corner section which can be simply removed with a sharp knife when not required.
- Can be laid to fit awkward shapes in any colour combination.
- System allows rapid extension or adaption of work areas and individual damaged tiles can be easily replaced.

Kumfi Tile Polyethylene

- Interlocking duckboard system, similar to PVC version but more rigid and advantageously priced - ideal for covering large areas economically.
- Ideal for packing stations, walkways and light duty industrial applications.
- Compatible with PVC bevel system.

Conductive Anti-static Matting

- ESD Kumfi Pebble and ESD Kumfi Tough are formulated to dissipate static electricity.
- Simple worker tasks - working, walking or even sitting on certain types of stools - creates static electric.
- Left unchecked, static can discharge into static sensitive equipment, potentially causing damage.
- Conductive/Anti-static matting drains static from workers, preventing unpleasant static shocks and safeguarding equipment.

ESD Kumfi Pebble

- Anti-fatigue vinyl sponge matting designed to provide anti-static protection in light duty applications.
- Ideal for assembly lines, computer rooms, hospitals and photocopy areas.
- Meets IEC61340-4-1 (category DIF) measured resistance Rg 10⁶-10⁹Ω, Rp 10⁶-10⁹Ω.
- Electrostatic charge (walking test) meets ISO6356 and EN1815.

Product Testing

This mat type has been independently tested by an accredited laboratory to give the following results.

Critical Fall Height : 2.8m

Tested in accordance with BSEN 1177-1998

Ignition : Best flammability safety category

Tested in accordance with BS7188 : 1998 Method 7.

The effectiveness and appearance of carpet mats can be maintained by regular cleaning. This also prevents the abrasive effect of dirt lodged in the fibres, thus prolonging the mats' life. The following cleaning methods will ensure that walked-in dirt is minimised and a good first impression is created at all times.

Interior Mats

- 1) Vacuum daily
- 2) Extraction clean periodically

Machine washable mats can be be laundered if required, but the above methods can also be used.

Exterior and Recessed Mats

- 1) Vacuum daily
- 2) Vacuum, sweep or hose down underneath weekly – this is most important as the mats can self-destruct if grit and debris are left underneath.

Periodic pressure washing or steam cleaning is also strongly recommended for outdoor mats.

This chart is designed to assist you in selecting the best mat for any application where chemicals may be present.

All Taylor West products have been manufactured to exceptionally high standards and performance tested, enabling them to be offered to today's demanding market with complete confidence.

The performance icons for each product reflect not only the results of these tests but also 'real life' feedback from users over many years. They also help to guide a prospective client to the appropriate choice for their application.

Many other tests including flame retardancy, ESD performance, voltage resistance and critical fall height are detailed on specification sheets which are available on request.

Another important feature of most of our rubber anti-fatigue mats is that they are silicone free and therefore wholly suitable for use in vehicle painting areas.

Entrance Mats

Ratings are given depending on the amount of moisture per square metre which can be absorbed.

A test to simulate wear is applied and the appropriate ratings are given on the product icons.

The higher the rating, the greater the weight of dust and dirt is collected in the particular mat. This capability is greatly enhanced by the design and quality of the yarns used in the manufacture of the mats.

Industrial Mats

ASTM D3844-92. An accelerated wear test whereby total loss of material weight is measured when subjected to 5000 cycles under an abrasive wheel.

ASTM C1028-89 & DIN-E-51130, 51097. These tests measure the force required to cause slippage of a local load across the surface of the material. The coefficient of friction ratio is the force divided by the weight. The higher the performance icon, the greater the coefficient of friction ratio, thus the greater the slip resistance of the mat.

ASTM D3574. This is a simple deflection/compression test which gives a rating depending on the difference in height of a mat before and during the time a weight has been placed on it. The greater the difference, the better the anti-fatigue properties and overall product performance.

Environmental Policy

Taylor West has a long term commitment to protecting the environment. Recycled and recycleable materials are used where possible and manufacturing processes are being continually updated to ensure that this is maintained. All Blue Diamond sponge products are D.O.P (Diocetyl Phthalate) free. This is a toxic additive used to cheapen vinyl compounds. As it is released into the air, soil, liquids or foods it can cause serious health problems.
